

# EVAPORATIVE COOLERS FOR YOUR AUTOMOTIVE SHOP

**Make Your workshop the COOLEST one.....**

Is high heat in your industrial worksite affecting the productivity of your workers and your bottom line? We can help....Rent or invest in an H2O Mobile Evaporative Cooler.

In the automotive industry, accuracy and precision are crucial, most inspections and repairs are conducted within the workshop. Working around hot equipment and employees that are doing welding processes, adds to the heat in the workshop. This means in summer a lot of time is spent working in hot uncomfortable conditions.

As the temperature rises, productivity and accuracy decrease. Studies show that productivity drops as the temperature rises above 27°C. In fact, it can drop by as much as 30% by the time the temperature reaches 38°C.

Mistakes increase as accuracy decrease due to the heat. One study by NASA showed that workers make almost 12 times as many mistakes when the temperature is 35°C compared to a temperature of 27°C.

When customers depend on You ..... You can depend on us. H2O mobile coolers offer the perfect solution to summer heat build-up within the workshop. H2O mobile coolers can be moved all around the workshop to create the perfect comfort zone where required.

## **Benefits of using an evaporative cooler will be:**

- Improved productivity of technicians
- Fewer mistakes by staff
- Better morale among maintenance technicians
- Freedom to move the mobile cooler within the workshop
