

EVAPORATIVE COOLERS FOR INDUSTRY

Heat exhaustion within the workshop can happen quickly..... If you have an industrial workshop, where the summer heat build-up inside the workshop is higher than the heat outside. Hot conditions within the workshop will affect your productivity, accuracy and profitability negatively.

Taking into consideration the high cost of labour and how high temperatures, directly influences productivity. It would be an investment to create the ideal working environment for your employees. The ideal cool working environment can be created by renting or purchasing an H2O mobile evaporative cooler. Make a cool decision and invest in an H2O mobile evaporative cooler.
