

Internal Components

This internal component picture illustrates all the components and the placement layout of each component within the mobile cooler.

- Durable one-piece rotation moulded Polyethylene plastic housing
- Low water shut off
- Aluminium cooling pad support bracket
- Submersible water pump in debris protection bag
- Drain plug
- Water inlet, water flow valve and drain valve connector
- Ball valve, supply water shut off
- Water distribution hose
- EC motor
- Impellor blade assembly
- Fan bracket assembly
